## AMENDMENTS TO THE CLAIMS

The claims are not amended herein. Therefore, the current status of the claims is as follows:

- (Original) A urea grease composition comprising a lubricating base oil and from 2 to 30 wt.% of a thickening agent, with respect to the total weight of the urea grease composition and wherein said thickening agent is selected from the group consisting of:
  - $(1) \ a \ mixture \ of \ a \ compound \ (a) \ and \ a \ compound \ (b), \ containing \ compound \ (a) \ at \ 20 \ to$
  - 80 mol %, relative to the total amount of compound (a) and compound (b);
  - (2) a mixture formed by mixing with a compound (c) with a mixture (1) or
  - (3) a compound (c) alone,

wherein the compounds are represented by the general formulae

- (a) R<sub>1</sub>NHCONHR<sub>2</sub>NHCONHR<sub>1</sub>:
- (b) R<sub>3</sub>NHCONHR<sub>2</sub>NHCONHR<sub>3</sub> and
- (c) R<sub>1</sub>NHCONHR<sub>2</sub>NHCONHR<sub>3</sub>.

and wherein  $R_2$  is a diphenylmethane group,  $R_1$  is a  $C_{6\cdot 10}$  saturated alkyl group and  $R_3$  is a  $C_{14\cdot 40}$  saturated and/or unsaturated alkyl group wherein unsaturated alkyl groups constitute at least 20 mol % of the  $R_3$  alkyl group.

- 2. (Original) The urea grease composition of claim 1 wherein unsaturated alkyl groups constitute at least 30 mol% of the  $R_3$  alkyl group.
- (Original) The urea grease composition of claim 1 wherein an oleyl component constitutes at least 20 mol % of the R<sub>3</sub> alkyl group.
- (Original) The urea grease composition of claim 2 wherein an oleyl component constitutes at least 20 mol % of the R<sup>3</sup> alkyl group.
- (Original) The urea grease composition of claim 1 wherein said composition further comprises a zinc compound as an additive.

- (Original) The urea grease composition of claim 2 wherein said composition further comprises a zinc compound as an additive.
- (Original) The urea grease composition of claim 3 wherein said composition further comprises a zinc compound as an additive.
- (Original) The urea grease composition of claim 5 wherein said zinc compound is selected from the group consisting of zinc dithiocarbamates and zinc dithiophosphates.
- (Original) The urea grease composition of claim 8 wherein unsaturated alkyl groups constitute at least 30 mol% of the R<sub>3</sub> alkyl group.
- 10. (Original) The urea grease composition of claim 8 wherein an oleyl component constitutes at least 20 mol % of the R<sub>3</sub> alkyl group.
- 11. (Original) The urea grease composition of claim 1 wherein said composition further comprises a molybdenum compound as an additive.
- (Original) The urea grease composition of claim 2 wherein said composition further comprises a molybdenum compound as an additive.
- 13. (Original) The urea grease composition of claim 3 wherein said composition further comprises a molybdenum compound as an additive.
- 14. (Original) The urea grease composition of claim 11 wherein said molybdenum compound is selected from molybdenum dithiocarbamates, molybdenum dithiophosphates and molybdenum complexes that are reaction products of a fatty oil, diethanolamine and a molybdenum source.
- 15. (Original) The urea grease composition of claim 14 wherein unsaturated alkyl groups constitute at least 30 mol% of the R<sub>3</sub> alkyl group.

Response to Office Action dated July 14, 2006 Serial No. 10/728 301

- 16. (Original) The urea grease composition of claim 14 wherein an oleyl component constitutes at least 20 mol % of the R<sub>3</sub> alkyl group.
- 17. (Original) The urea grease composition of claim 1 wherein the thickening agent is present in an amount of from 5 to 20 wt.%, with respect to the total weight of the urea grease composition.
- (Original) The urea grease composition of claim 17 wherein unsaturated alkyl groups constitute at least 30 mol% of the R<sub>3</sub> alkyl group.
- (Original) The urea grease composition of claim 17 wherein said composition further comprises a zinc compound as an additive.
- (Original) The urea grease composition of claim 17 wherein said composition further comprises a molybdenum compound as an additive.
- 21. (Original) A method of lubricating a bearing, comprising packing the bearing with the urea grease composition of claim 1.
- 22. (Original) A method of lubricating a bearing, comprising packing the bearing with the urea grease composition of claim 2.
- 23. (Original) A method of lubricating a bearing, comprising packing the bearing with the urea grease composition of claim 3.
- 24. (Original) A method of lubricating a bearing, comprising packing the bearing with the urea grease composition of claim 5.
- 25. (Original) A method of lubricating a bearing, comprising packing the bearing with the urea grease composition of claim 8.

Response to Office Action dated July 14, 2006 Serial No. 10/728 301

- 26. (Original) A method of lubricating a bearing, comprising packing the bearing with the urea grease composition of claim 11.
- (Original) A method of lubricating a bearing, comprising packing the bearing with the urea grease composition of claim 14.
- 28. (Original) A method of lubricating a sliding surface of a machine in a relative motion, comprising lubricating said sliding surface with the urea grease composition of claim 1.
- 29. (Original) A method of lubricating a sliding surface of a machine in a relative motion, comprising lubricating said sliding surface with the urea grease composition of claim 2.
- 30. (Original) A method of lubricating a sliding surface of a machine in a relative motion, comprising lubricating said sliding surface with the urea grease composition of claim 3.
- 31. (Original) A method of lubricating a sliding surface of a machine in a relative motion, comprising lubricating said sliding surface with the urea grease composition of claim 5.
- 32. (Original) A method of lubricating a sliding surface of a machine in a relative motion, comprising lubricating said sliding surface with the urea grease composition of claim 8.
- 32. (Original) A method of lubricating a sliding surface of a machine in a relative motion, comprising lubricating said sliding surface with the urea grease composition of claim 11.
- 34. (Original) A method of lubricating a sliding surface of a machine in a relative motion, comprising lubricating said sliding surface with the urea grease composition of claim 14.

- 35. (Original) A urea grease composition comprising a lubricating base oil and from 2 to 30 wt.% of a thickening agent, with respect to the total weight of the urea grease composition and wherein said thickening agent is selected from the group consisting of:
  - a mixture comprising compound (a) and compound (b), containing compound (a) at 20 to 80 mol%, relative to the total amount of compound (a) and compound (b);
  - (2) a mixture formed by mixing a compound (c) with a mixture (1); or
  - (3) a compound (c) alone,

herein the compounds are represented by the general formulae

- (a) R<sub>1</sub>NHCONHR<sub>2</sub>NHCONHR<sub>1</sub>;
- (b) R<sub>3</sub>NHCONHR<sub>2</sub>NHCONHR<sub>3</sub>; and
- (c) R<sub>1</sub>NHCONHR<sub>2</sub>NHCONHR<sub>3</sub>,

and wherein  $R_2$  is a diphenylmethane group,  $R_1$  is a  $C_8$  saturated alkyl group,  $R_3$  is a  $C_{14;20}$  saturated and/or unsaturated alkyl group, with the alkyl groups being such that this constituent includes at least 20 mol% of an oleyl constituent.
